SPDS: Panel C-19 Return Valve Signals

Reference: BECo Letter dated August 30, 1990
TAC 58014

This is to notify you that the final 2 signals for the Safety Parameter Display System (SPDS), identified in the referenced letter, have been installed in the system. These signals, Sampling Panel C-19 Return Valves (CV-5065-91 and 92), were completed on May 8, 1991.

This completes the base load work for the installation and operation of SPDS. All future SPDS modifications, for example upgrading the system to later editions of the Emergency Operating Procedures, will be performed under normal plant procedures for modifications.

G. W. Davis
