Subject: Arkansas Nuclear One - Units 1 & 2
Docket Nos. 50-313 and 50-368
License Nos. DPR-51 and NPR-6
Revision 13 to the Quality Assurance
Manual Operations (QAMO)

Gentlemen:

In accordance with 10CFR50.54(a)(3) and 10CFR50.71, thirteen copies (Copy Nos. 1-6 and 10-16) of Revision 13 to ANO Quality Assurance Manual Operations (QAMO) were freighted to the U. S. NRC, Document Control Desk, on July 22, 1991.

The changes made in Revision 13 to the subject manual have been evaluated as required by 10CFR50.54(a) to determine if quality commitments have been reduced. Results of our evaluation have determined that these changes do not reduce any commitments in the Quality Program description previously accepted by the NRC. Revision 13 pertains primarily to organizational changes, clarification of existing wording, and changes to reflect our current practices in implementing the requirements of this manual. The Record of Revisions section of the manual identifies changes implemented by this revision.

In the submittal letter for Amendment 9 to the ANO-1 and ANO-2 Safety Analysis Reports dated July 22, 1991, certain procedure revisions were identified whose SAR change was not incorporated in the update. Similarly, four procedure revisions which involve the QAMO have been identified. These changes will be incorporated into a special revision to the QAMO and will be submitted to the NRC by October 25, 1991.

As required by 10CFR50.71(e)(2), I hereby certify that to the best of my knowledge and belief, with the exception discussed above, the information contained in Revision 13 to the QAMO accurately represents changes made since the previous submittal. These changes reflect information and analysis submitted to the Commission or prepared pursuant to Commission requirements or changes made under the provisions of 10CFR50.54(a)(3).

The QAMO, Revision 13, contains a brief cover letter, record of revision instructions and revised QAMO text pertaining to the Quality Assurance Program at Arkansas Nuclear One.

Sincerely,

NSC/lpi
