Docket No. 50-267

SUBJECT: Fort St. Vrain Updated FPPP, Revision 5

REFERENCE: 1) PSC Letter, Brey to Document Control Desk, dated
July 22, 1991 (P-91236)
2) NRC letter, Erickson to Crawford, dated May 21, 1991
(G-91106)

Gentlemen:

Enclosed is one (1) signed original and ten (10) additional copies of Revision 5 to the Fire Protection Program Plan (FPPP) for Fort St. Vrain (FSV) which has been prepared and is being submitted in accordance with 10CFR50, Section 50.71(e).

This revision includes the effects of changes made to the facility and procedures as described in the Updated FPPP; safety evaluations performed by PSC, either in support of license amendments or in support of conclusions that changes did not involve an unreviewed safety question, and analyses of new safety issues performed by or on behalf of PSC at Commission request.

Brief descriptions of the principal changes or additions to affected sections of the FPPP, Revision 5, are included in Attachment A. 10CFR50.71(e)(2)(ii) requires that this submittal identify changes made under the provisions of 10CFR50.59 but not previously submitted to the Commission. Most changes reflected in Revision 5 of the FPPP, that were under the provisions of 10CFR50.59, are identified in the 1991 10CFR50.59 annual report (Reference 1) or previous 10CFR50.59 annual reports. Other changes made in the FPPP, not requiring prior Commission approval pursuant to 10CFR50.59(a), and not yet reported to the Commission, are listed in Attachment B of this letter. These changes will be more fully described along with the results of their

safety evaluations, as appropriate, in PSC's next annual report of 10CFR50.59 changes.

In accordance with Generic Letter 86-10, 10CFR50.59 safety evaluations were performed on Revision 5 changes to the FPPP. The evaluations determined that the revisions did not involve or create an unreviewed safety question and did not require changes to the FSV Technical Specifications.

PSC received a "Possession Only License" in Amendment No. 82 to the FSV Facility Operating License (Reference 2). Since 10CFR50.71(e) only applies to those nuclear reactors licensed to operate, it is no longer applicable to FSV. Therefore, Revision 5 to the Updated FPPP will be the last required revision submitted to the NRC.

If you have any questions or comments, please contact Mr. M. H. Holmes at (303) 480-6960.

Very truly yours,

A. Clegg Crawford
Vice President
Nuclear Operations
