GENTLEMEN:

I have been doing extensive research in the effects of ionizing radiation; along with my own research, and study I have been teaching students the effects of radiation, and the pros and cons of the coming "NUCLEAR AGE" in the United States

There is much concern about the "ZIMMER NUCLEAR POWER PLANT" being constructed here in the Cincinnati area. We would like to study all the facts about these plants throughout the U.S. etc.....

Please send our group the following information:
