Director of Nuclear Reactor Regulation
Attention: Mr. R. A. Clark, Chief
Operating Reactors Branch #3
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: Calvert Cliffs Nuclear Power Plant
Units Nos. 1 & 2; Dockets Nos. 50-317 and 50-318
Control of Heavy Loads, NUREG-0612

- References: (a) BG&E letter from Mr. R. F. Ash, Jr. to
Mr. D. G. Eisenhower (NRC), dated January 25, 1983
- (b) BG&E letter from Mr. R. F. Ash, Jr. to
Mr. D. G. Eisenhower (NRC), dated May 24, 1983

Gentlemen:

A recent review of statements made in previous correspondence addressing the resolution of NUREG-0612 issues for Calvert Cliffs has revealed the need to provide clarification on one issue. The purpose of this letter is to provide such clarification.

In Reference (a) we responded to various issues raised during your review of our "Control of Heavy Loads" Phase I submittal. Included in our response was a statement that . . . "Repair to CE (Combustion Engineering) designed rigs would be per CE advice."

In Reference (b) we provided additional information, this time in response to open items remaining in the draft technical evaluation report for Calvert Cliffs, which contained a statement that . . . "any repairs would be done in accordance with the rig vendor's recommendations."

We wish to amend the above two statements to read as follows:

"Future vendor recommendations on structural repairs will be considered. Any repairs will be performed in accordance with Calvert Cliffs plant procedures."

The above is provided only as editorial clarification of an issue upon which we have already reached mutual agreement, and does not alter the intent of prior commitments made by the Baltimore Gas and Electric Company.

Sincerely,

A handwritten signature in dark ink, appearing to read "R. E. Architzel". The signature is fluid and cursive, with a long horizontal stroke at the end.
