Subject: Arkansas Nuclear One - Units 1 and 2
Docket Nos. 50-313 and 50-368
License Nos. DPR-51 and NPF-6
Change to the Industrial Security Plan, Revision 30

Gentlemen:

In accordance with 10CFR50.4, enclosed is the original plus three copies (Copy Nos. 1-4) of Revision 30 to the Arkansas Nuclear One (ANO) Industrial Security Plan (ISP). Copies 5 and 6 are submitted concurrently to NRC Region IV. The primary reasons for this revision are to redefine the term licensee designated vehicle, clarify authorized storage of contingency equipment, modify the rifle qualification course, and to incorporate the dry fuel cask storage pad and station blackout diesel generator into the site layout figures. A detailed description of the changes is attached with the added text denoted by bold, italics print.

In accordance with 10CFR50.54(p), it was determined by Entergy Operations that the changes do not decrease the safeguards effectiveness of the plan; therefore, no prior NRC approval is required.

The attached material describes current and proposed security measures and is considered to be safeguards information as defined by 10CFR73.21. The attached documentation should be handled accordingly.

Very truly yours,

Dwight C. Mims
