U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Attention: Mr. Domenic B. Vassallo, Chief

Dear Mr. Vassallo:

Subject: Proposed Change No. 5 to Technical Specifications -
Inservice Inspection
Cooper Nuclear Station
NRC Docket No. 50-298, DPR-46

Your letter of May 19, 1983, stated that the Technical Specifications for Cooper Nuclear Station (CNS) do not incorporate provisions for allowing relief granted from inservice inspection pursuant to 10 CFR 50.55a(g), and requested that an applicable Technical Specification change be submitted. Accordingly, Nebraska Public Power District requests that the Technical Specification for CNS be revised to incorporate the enclosed six pages.

No fee is submitted with this request because an essentially identical request was submitted May 16, 1977 and not acted upon. Furthermore, this change is submitted at the written request of the Commission to simplify the Technical Specifications.

Should you have any questions or require additional information, please contact me.

In addition to three signed originals, 37 copies are also submitted for your use.

Sincerely,

L. G. Kuncel
Assistant General Manager - Nuclear
