SUBJECT: Beaver Valley Power Station - Unit No. 2
Docket No. 50-412
Regulatory Guide 1.97 Implementation Report

Gentlemen:

With Supplement 1 of NUREG 0737 (Generic Letter No. 82-33) the NRC issued requirements for emergency response activities, which included Regulatory Guide 1.97 Instrumentation. The attached Regulatory Guide 1.97 Implementation Report is submitted in accordance with the previous schedule provided in Duquesne Light Company's (DLC) response to Generic Letter No. 82-33 (2NRC-3-017, dated April 15, 1983). DLC plans to meet the intent of the NRC's requirements for Regulatory Guide 1.97 and submits the Implementation Report at this time. The information provided in this report will be utilized to update Section 7.5 of the Final Safety Analysis Report.

If there are any questions in this regard, please contact Mr. E. F. Kurtz, Jr., Manager, Regulatory Affairs Department, at (412) 787-5141, extension 103.
