Glen Ellyn, Illinois 60137

RE: Perry Nuclear Power Plant  
Docket Nos. 50-440; 50-441  
Lubricating Oil System Defect in  
Standby Diesel Generators [RDC 24(81)]

Dear Mr. Keppler:

Our letter to you dated January 6, 1983, stated that the installation of tubing for modification of the turbocharger lubricating oil system would be completed by July 1983 for Unit 1 and September 1983 for Unit 2.

Presently, 90% of the required parts have been received; however, installation cannot begin until repairs of Code piping welds are completed. We now anticipate completion by the following scheduled dates: Unit 1 - December 1983; Unit 2 - February 1984.

Please contact us if you have any questions.

Sincerely,

Murray R. Edelman  
Vice President  
Nuclear Group
