Edwin I. Hatch Nuclear Plant  
Request to Revise Technical Specifications:  
Improved Standard Technical Specifications Submittal Revision

Gentlemen:

By letter dated February 25, 1994, Georgia Power Company proposed to convert the current Edwin I. Hatch Nuclear Plant Technical Specifications to the Improved Technical Specifications consistent with NUREG 1433. Attached is a partial revision to the February 25 amendment request. The attachment includes page change insertion instructions. Any revisions to, or additional no significant hazards evaluations, are also provided. The Environmental Assessment provided in the February 25, 1994, submittal remains valid. This revision is a result of site and generic efforts to clarify LCO 3.0.4 and changes in position titles described in the Technical Specifications. Appendix B to the license is also affected by the changes in position titles. A request to revise Appendix B will be made via a separate request on a schedule commensurate with conversion implementation.

In accordance with the requirements of 10 CFR 50.91, a copy of this letter and all applicable attachments will be sent to the designated State official of the Environmental Protection Division of the Georgia Department of Natural Resources.
