Docket No. 50-338
License No. NPF-4

Gentlemen:

VIRGINIA ELECTRIC AND POWER COMPANY
NORTH ANNA POWER STATION UNIT 1
RESPONSE TO NRC GENERIC LETTER 89-10
SAFETY-RELATED MOV TESTING AND SURVEILLANCE

On June 28, 1989, the NRC issued Generic Letter 89-10, entitled "Safety-Related Motor-Operated Valve Testing and Surveillance." Virginia Electric and Power Company (Virginia Power) responded to the Generic Letter on December 26, 1989 (Serial No. 89-530) stating that the necessary reviews, analyses, verifications, tests and inspections would be conducted in order to meet the schedule and recommendations provided in the Generic Letter. Further clarification of our response was provided in letters dated February 15, 1993 and December 3, 1993 (Serial Nos. 92-330 and 93-664, respectively).

Item m. of the Generic Letter requires NRC notification within 30 days of the completion of the recommended actions. This letter fulfills that requirement. During the recent refueling outage which ended on October 10, 1994, North Anna Unit 1 completed the commitments associated with the Generic Letter items a. through h. Therefore, notification was required by November 9, 1994. Based on a November 2, 1994 telephone conversation between Mr. Leon B. Engle, NRC Project Manager, and Mr. Joseph D. Hegner of Virginia Power, Mr. Leon B. Engle agreed to extend the 30 day notification requirement. This provided sufficient time to allow Virginia Power representatives to attend and evaluate the results of the NRC workshop on closure of Generic Letter 89-10 which was held on November 8, 1994.

Inspection Report Nos. 50-338/94-04 and 50-339/94-04, dated May 27, 1994, identified that information concerning the valve stem coefficient of friction is expected by NRC to be furnished for program closure. A study has been initiated to evaluate the available data concerning this issue. This study will be completed 30 days after the completion of the upcoming North Anna Unit 2 refueling outage. This outage is currently scheduled for March 25, 1995 through July 18, 1995.

Should you have additional questions, please contact us.

Very truly yours,

RF Saunders for

James P. O'Hanlon
