Subject: Peach Bottom Atomic Power Station, Units 2 and 3
Technical Specifications Change Requests 94-11, 94-12
and 94-13

Dear Sir:

PECO Energy Company (PECO Energy) hereby submits Technical Specification (TS) Change Requests Nos. 94-11, 94-12 and 94-13, in accordance with 10CFR50.90, requesting changes to Appendix A and Appendix B of the Peach Bottom Facility Operating Licenses. The proposed changes relocate audit topics and frequencies, Nuclear Review Board review requirements, and requirements associated with the Independent Safety Engineering Group function to licensee controlled documents. These changes are consistent with those in TS Change Request No. 93-16 which was submitted on September 29, 1994 to adopt the TS in NUREG-1433, "Standard Technical Specifications General Electric Plants, BWR/4." PECO Energy is pursuing the subject changes to the review and audit requirements in advance of the overall conversion to NUREG-1433 TS and requests that the changes be processed expeditiously to be effective by January 3, 1995.

Attachment 1 to this letter describes the proposed changes and provides justification for the changes. Attachment 2 provides the revised Technical Specifications and Environmental Technical Specifications pages. If you have any questions regarding this matter, please contact us.

Very truly yours,

G. A. Hunger, Jr.
Director - Licensing
