Generic Letter 89-10

U S Nuclear Regulatory Commission  
Attn: Document Control Desk  
Washington, DC 20555

MONTICELLO NUCLEAR GENERATING PLANT  
Docket No. 50-263 License No. DPR-22

Supplemental Response to NRC Generic Letter 89-10, "Safety-Related  
Motor-Operated Valve Testing and Surveillance" (TAC M75685)

Generic Letter 89-10 (June 28, 1989), "Safety-Related Motor-Operated Valve Testing and Surveillance" requested holders of operating licenses to provide additional assurance of the capability of safety-related motor-operated valves (MOV's) and position-changeable MOV's in safety-related systems. Supplements to Generic Letter 89-10 were issued by the NRC: Supplement 1 (June 13, 1990), Supplement 2 (August 3, 1990), Supplement 3 (October 25, 1990), Supplement 4 (February 12, 1992), Supplement 5 (June 28, 1993), and Supplement 6 (March 8, 1994). Monticello has responded to Generic Letter 89-10 and its supplements by correspondence dated December 27, 1989; December 13, 1990; April 8, 1991; September 3, 1991; and September 24, 1993.

Reporting Requirement Item "m" of the June 28, 1989 Generic Letter states:

*Each licensee shall notify the NRC in writing within 30 days after the actions described in the first paragraph of item i. have been completed.*

Monticello Response:

Monticello has completed the design basis reviews, established the correct switch settings, and has completed the requisite testing to establish assurance of the capability to perform safety-related functions for those valves in the Generic Letter 89-10 MOV program. All design changes to MOV's, initiated from the Generic Letter 89-10 MOV program reviews and analyses, have been completed. We believe we have performed the necessary actions to satisfy the intent of the recommendations of the first paragraph of item "i" of Generic Letter 89-10.

This letter contains no new NRC commitments, nor does it modify any prior commitments.
