Subject: License Amendment Application to Revise Technical  
Specification 6.0 Regarding Station Review Board Composition and  
Organizational Titles

Gentlemen:

Enclosed is an application for an amendment to the Davis-Besse Nuclear Power Station (DBNPS), Unit Number 1, Operating License Number NPF-3, Appendix A, Technical Specifications. The proposed changes involve Technical Specification 6.0, Administrative Controls.

The proposed changes affect Technical Specification (TS) 6.0 by revising the Station Review Board (SRB) composition. In addition, various other position titles within TS 6.0 are proposed for revision to reflect organizational changes. The proposed changes are administrative in nature.

The proposed changes are similar to the intent of the Nuclear Regulatory Commission's (NRC's) guidance of Generic Letter (GL) 88-06, dated March 22, 1988, Removal of Organization Charts from Technical Specification Administrative Control Requirements (Toledo Edison letter Log Number 2534). The proposed changes are similar to those approved by the NRC on October 10, 1989 as License Amendment Number 122 (TAC Number 74194) to the Crystal River Nuclear Generating Plant Operating License Number DPR-72, Appendix A, Technical Specifications and approved by the NRC on November 14, 1990 as License Amendment Number 10 (TAC Number 75616) and 20 (TAC Number 75617) to South Texas Projects Unit 1 and 2 Operating License Number NPF-80, Appendix A, Technical Specifications.
