Subject: Supplement to Final Report  
Independent Design Verification Program  
Detroit Edison - Enrico Fermi Unit 2  
Docket #50-342  
L

Dear Sirs:

On July 20, 1983, Cygna received a copy of Detroit Edison's comments on Cygna's Final Report for the Independent Design Verification Program on Fermi 2. Their document, as well as the specific comments provided by the NRC in a June 15, 1983 meeting (and also a subsequent conference telecon on June 17, 1983), will form the basis for providing supplemental information to our Final Report. The supplement will essentially expand a number of the Observation Review Records and Potential Finding Reports to include more backup and background material. This information will further clarify the results of our review and also provide additional support for Cygna's conclusions. In particular, it is our intent to identify more clearly and concisely those areas where Cygna found it necessary to expand the review scope beyond that contained in our original program plan.

A schedule for completing this additional effort is presented in Attachment A to this letter. As shown, Cygna anticipates this effort can be completed by October 14, 1983. The supplement will be prepared and submitted in the form of an amendment to the Final Report with text additions marked in the margins

and new pages provided for replacement. Cygna will also maintain our independence from Detroit Edison until the Operating License is issued on Fermi 2 as directed by both the NRC and Detroit Edison.

Please contact me if you have any questions or comments on this proposed action.

Very truly yours,

*David A. Ferg*
