Docket No. 50-293

NUREG-0803 Procedures Review

Reference: (A) Boston Edison Company Letter (A.V. Morisi) to NRC (D.B. Vassallo),
dated June 4, 1982 (2.82.160).

Dear Sir:

In Reference A Boston Edison Company (BECO) transmitted its response to NUREG-0803, "Generic Safety Evaluation Report Regarding Integrity of BWR Scram System Piping." In that response, we committed to review several procedures against the criteria outlined in NUREG-0803. In a subsequent telecon on May 3, 1983 with K. Eccleston - NRC Pilgrim Project Manager, we requested that the commitment due date specified in Reference A be revised subject to the development of a new plan and schedule.

Please be informed that we have completed the procedures review. No revisions were necessary or desired.

Should you require any additional information, please contact us.

Very truly yours,

WD Harrington
