Atlanta, Georgia 30303

SUBJECT: Virgil C. Summer Nuclear Station
Docket No. 50/395
Operating License No. NPF-12
Westinghouse 7300 Process System
10 CFR 21 Response

Dear Mr. O'Reilly:

As discussed with Mr. R. C. Butcher on July 15, 1983, South Carolina Electric and Gas Company (SCE&G) provided in a letter dated June 17, 1983, a report under the provision of 10 CFR 21 concerning two (2) potential problems within the 7300 Process Protection System. This letter stated that relay contacts on the NTC cards in question would be bypassed by permanently installed jumpers by July 15, 1983; however, due to delays in finalizing the proper jumper placement, installation will not be completed by the estimated date.

Instructions for the permanent jumper installation have been finalized and work is ongoing at this time. Jumper installation should be completed by August 15, 1983.

The June 17, 1983, letter also stated that an investigation would be performed to determine the number of Loop Power Supply (NLP) cards requiring heat sink replacement. Also, it was stated that an inspection of these identified cards will be conducted during each periodic system test as required by Technical Specifications until the heat sinks are replaced. To date, the aforementioned investigation has been performed with no loose heat sinks discovered on installed cards.

A monthly visual inspection of the subject NLP cards will be performed until they are replaced.

Very truly yours,

O. W. DIXON, JR.
