Re: Catawba Nuclear Station  
Units 1 and 2  
Docket Nos. 50-413 and 50-414

Dear Mr. O'Reilly:

In the Corrective Action section of the final response to Significant Deficiency Report SD 413-414/80-10, dated March 31, 1981, it was stated that the restoration work on the personnel air locks would be complete by December 31, 1982. Due to the finding of more defects in the air locks than had been anticipated while performing the work required to resolve Significant Deficiency SD 413-414/82-22, the restoration work will now be complete by September 23, 1983.

Very truly yours,

*H. B. Tucker*
