UNITED STATES OF AMERICA  
NUCLEAR REGULATORY COMMISSION  
OFFICE OF SECRETARY  
DOCKETING & SERVICE  
BRANCH

Before the Atomic Safety and Licensing Board

In the Matter of )  
 )  
Philadelphia Electric Company ) Docket Nos. 50-352  
 ) 50-353  
(Limerick Generating Station, )  
Units 1 and 2) )

Affidavit of John S. Kemper  
Vice President, Engineering and Research  
Philadelphia Electric Company

John S. Kemper being first duly sworn according to law comes  
forward and states:

1. My name is John S. Kemper. I am Vice President, Engineering  
and Research, of the Philadelphia Electric Company. In this position, I  
have overall responsibility for the design and construction of the  
Limerick Generating Station.

2. In its Second Special Prehearing Conference Order (LBP-83-39)  
dated July 26, 1983 at 38-39, the Company was requested to verify  
certain portions of counsel's letter to the Board dated May 20, 1983.  
In the process of conducting a further review of this matter to respond  
to the Board's request, it was discovered that not all welds which were  
inspected by the subject inspector had been identified and therefore not  
reinspected as had previously been believed.

3. It presently appears that in addition to the 29 Weld Inspection Plans listed on page 8 of 8 of Attachment 8 to counsel's May 20, 1983 letter, there are a number of Weld Inspection Plans in which the subject inspector participated.

4. The Company is presently continuing its investigation to assure that the list of Weld Inspection Plans is complete and that the newly identified welds are reinspected or otherwise properly dispositioned.

John S. Kemper  
John S. Kemper

Sworn to me this 10th day of August, 1983.

Patricia D. Scholl  
Notary Public
