Subject: Draft Environmental Assessment
Attachments: Draft EA.docx

Attached is a draft environmental assessment for an exemption to store fuel assemblies with a larger pellet diameter than currently allowed in the HI-STORM FW Amendment 1, Revision 1 storage system at the Calvert Cliffs Nuclear Power Plant. The attached file is encrypted. I provided the password by phone earlier. I would appreciate receiving either comments or a notice of no comments from you within thirty days. Please let me know if you need additional time. In parallel, I am working on the Federal Register Notice to publish the environmental assessment.

If you or your staff, have any questions or concerns, please do not hesitate to contact me via phone or email. Since I am teleworking, e-mail will be the best communication method, but if you leave a message on my office phone, (301) 415-6877, I'll return your call as soon as possible.

Thanks, Chris Allen
