August 3, 1983

Cecil O. Thomas, Chief  
Standardization and Special Projects Branch  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Reference: License R-33, Docket 50-73

Dear Mr. Thomas:

The General Electric Company, Vallecitos Nuclear Center (VNC), requests an amendment to License R-33 for the General Electric Nuclear Test Reactor (NTR) which would permit the use of internal low voltage trip circuits in the NTR picoammeters and Log N meter. The proposed changes and their justifications are included in the attachment to this letter.

As this is an administrative amendment, a fee check for \$600.00 has been forwarded, by error, to the Division of Accounting and Finance (RM/A), Office of Resource Management. Mr. G. D. Johnson, Deputy Director, RM/A, has informed me that the check (No. 100187) has been received and deposited (August 3, 1983) and that he will so notify the License Fee Management Branch.

Sincerely,

G. E. Cunningham  
Senior Licensing Engineer
