Mr. Darrell G. Eisenhut, Director  
Division of Licensing  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Eisenhut:

Subject: Oyster Creek Nuclear Generating Station  
Docket No. 50-219  
Supplement 1 to NUREG 0737  
Procedure Generating Package for  
Emergency Operating Procedures (EOP's)

Reference: Letter date April 15, 1983, P. B. Fiedler  
to D. G. Eisenhut

Our submittal fulfilling the original response requirements of Supplement 1 to NUREG 0737 (Emergency Response Capabilities) was forwarded to you by the referenced letter. That submittal included a commitment to develop, and submit to the Commission, a procedure generation package for Oyster Creek's EOP's. Attached is the subject procedure generation package.

As part of the procedure generation package, a writer's guide was developed for the first draft of procedures written from generic guidelines. This writer's guide is being modified (for the reasons described below) and is not included in the Attachment.

The first draft procedures were evaluated by reactor operators, as well as human factors specialists, and format changes are being considered to improve the useability of the procedures. Since portions of the writers guide are closely linked to the format chosen, the writers guide will need to be modified during the development of the final procedure format. This final procedure format will again be evaluated by reactor operators and human factors specialists during walk-through on our Control Room mockup. The evaluation of the final procedure format should be completed by the end of August and an updated writer's guide will be completed, and submitted to the Commission, in September.
