0259.

Chairman Selin,

I was pleased to learn you are aware of Federal Regulations that allow you to have a personal shower installed in your office. Are you aware that Federal Regulations require that in the event of a Nuclear accident all persons arriving from the EPZ to the relocation center ~~sh~~ must be monitored for radioactive contamination within about 12 hours. (NuReg 0654 I 12) 10-CFR 50.47 (B-8).

My Children have neither monitoring nor showers for decontamination at their relocation center. Perhaps They could use your shower.

By the way - I love games but I always play to win - & I usually do -

Looking forward to chatting with you concerning the problem with Emergency Planning & The lack of "reasonable assurance."

Jane Fleming -
