Reference: Vogtle Electric Generating Plant - Unit 1  
50-424, Readiness Review Program, GN-424 C  
October 3, 1984

Attention: Mr. J. Nelson Grace

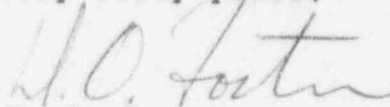

Module 13A of the Vogtle Unit 1 Readiness Review Program,  
entitled Foundation Materials and Backfill, is enclosed for  
review and acceptance by the Nuclear Regulatory Commission.

Based on the review detailed in this module, I am of the opinion  
that adequate controls exist to ensure the quality of work and  
the implementation of specific FSAR commitments within the scope  
of the module. Moreover, none of the findings identified,  
either individually or collectively, are such that the adequacy  
of the project foundation materials and backfill program is  
called into question.

The information herein is, to the best of my knowledge, factual  
and technically correct.

This submittal contains no proprietary information and may be  
placed in the NRC Public Document Room.

Very truly yours,

  
D. O. Foster
