Reference: Vogtle Electric Generating Plant - Unit 1
50-424, Readiness Review Program, GN-424 C
October 3, 1984

Attention: Mr. J. Nelson Grace

Module 13C of the Vogtle Unit 1 Readiness Review Program,
entitled Post-Tensioned Containment, is enclosed for review and
acceptance by the Nuclear Regulatory Commission.

Based on the review detailed in this module, I am of the opinion
that adequate controls exist to ensure the quality of work and
the implementation of specific FSAR commitments within the scope
of the module. Moreover, none of the findings identified,
either individually or collectively, are such that the adequacy
of the project containment post-tensioning system is called into
question.

The information herein is, to the best of my knowledge, factual
and technically correct.

This submittal contains no proprietary information and may be
placed in the NRC Public Document Room.

Very truly yours,

D. O. Foster
