Attention: Mr. J. Nelson Grace

Module 17 of the Vogtle Unit 1 Readiness Review Program,
entitled Raceways, is enclosed for review and acceptance by the
Nuclear Regulatory Commission.

Based on the review detailed in this module, I am of the opinion
that adequate controls exist to ensure the quality of work and
the implementation of specific FSAR commitments within the scope
of the module. Moreover, none of the findings identified,
either individually or collectively, are such that the adequacy
of the project raceway system is called into question.

The information herein is, to the best of my knowledge, factual
and technically correct.

This submittal contains no proprietary information and may be
placed in the NRC Public Document Room.

Very truly yours,

D. O. Foster
