50-424, Readiness Review Program, GN-424
October 3, 1984

Attention: Mr. J. Nelson Grace

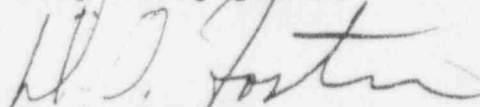

Module 20 of the Vogtle Unit 1 Readiness Review Program, entitled Instrumentation and Controls, is enclosed for review and acceptance by the Nuclear Regulatory Commission.

Based on the review detailed in this module, I am of the opinion that adequate controls exist to ensure the quality of work and the implementation of specific FSAR commitments within the scope of the module. Moreover, none of the findings identified, either individually or collectively, are such that the adequacy of the project instrumentation and controls is called into question.

The information herein is, to the best of my knowledge, factual and technically correct.

This submittal contains no proprietary information and may be placed in the NRC Public Document Room.

Very truly yours,

D. O. Foster
