Reference: Vogtle Electric Generating Plant - Unit 2
Readiness Review Program

Module 6 of the Vogtle Unit 2 Readiness Review Program, entitled Electrical Equipment, is enclosed for review and acceptance by the Nuclear Regulatory Commission (NRC).

Based on the review detailed in this module, I am of the opinion that adequate controls exist to ensure the quality of work and the implementation of Final Safety Analysis Report commitments within the scope of the module. Additionally, with resolution of the specific findings identified, the Project will fully comply with our licensing commitments.

The information herein is, to the best of my knowledge, factual and technically correct.

This submittal contains no proprietary information and may be placed in the NRC Public Document Room.
