Division of Project and Resident Programs

SUBJECT: 10CFR50.55(f) SAR QA Program

Gentlemen:

This letter is in response to your letter to Mr. E. J. Woolever, dated August 10, 1983, requesting additional information concerning the submittal of BVPS-2's Quality Assurance Program description in accordance with 10CFR50.55(f) (Reference 3).

RESPONSE: Listed below is the BVPS-2 response to the four items of concern expressed in your letter of August 10, 1983 (Reference 2).

Item No. 1. The intent of our submittal dated June 10, 1983, was to provide a current description of the QA Program previously approved with the BVPS-2 PSAR. This was provided by submittal of a list of all changes made since the description was last approved, each of which was cross-referenced with the previously approved description by placing a corresponding number in the margin of the approved description. Although the QA Program description was not revised in the PSAR to incorporate the changes, the submittal did provide a marked-up current description which specifically identified each change. Additionally, a controlled copy of the DLC QA Program (which is always provided with the latest revision) is at Region I and was provided prior to 10CFR50.55(f) requirements. In our discussions with Mr. P. Bissett and Mr. P. K. Eapen, they indicated that our submittal should have incorporated the changes into the QA Program description text. It is our belief that simply providing a revised description will obscure the changes in the revised text. However, per your request, BVPS-2 will provide a current QA Program description, incorporating the changes and submit it by January 31, 1984.

2. DLC will follow the guidance of ANSI N45.2.10-1973.
