Total	4	6	0	1	0	5	2	1			19

- 1 = barbiturates  
2 = methaqualone  
3 = methadone  
4 = benzodiazepines

### **Management Actions:**

- During this report period we had a total of nineteen (19) positive Fitness-for-Duty (FFD) tests. Nineteen (19) of those were pre-access and part of the pre-screening process during Refuel Outage 5 (RFO-5).

### **Fitness-for-Duty Initiatives:**

- In our effort to support River Bend Station in a Customer Service environment, we elected to send all FFD specimens to our on-site laboratory at Grand Gulf Nuclear Station. This change allowed us to receive results from three (3) days down to less than twenty-four (24) hours.

### **Effectiveness Evaluation:**

- In an effort to streamline our process, we are currently working initiatives to do business the same way at each of our four sites. To make that task a reality, we are working to streamline our procedures and our process as a collective unit.
- During the month of March we reduced our Random Testing from 100% to 50%. The big plus here is in monetary savings.
- Reference our 02/25/94 report, all items identified in the December FFD assessment have been corrected.

### **Reportable Incidents:**

- None this period.
