Dynamic Qualification  
SER Outstanding Issue No. 8  
Shoreham Nuclear Power Station - Unit 1  
Docket No. 50-322

Reference: (1) Letter SNRC-796 to H. R. Denton (NRC) from  
J. L. Smith (LILCO) dated November 23, 1982.

Dear Mr. Denton:

The purpose of this letter is to provide confirmatory information to facilitate staff closeout of the above SER issue.

Reference 1 indicated that the NRC would be notified of completion of certain RCIC Turbine modifications upon which qualification is dependent. Attachment 8 to Reference 1 contained the three Field Disposition Instructions (FDI's) which outlined the required modifications. These modifications have now been completed.

Reference 1 also committed to have detailed NSSS qualification documentation located at the Shoreham site to backup the NSSS equipment dynamic qualification summaries. The detailed documents referenced in the NSSS summaries have now been delivered to the Shoreham site for the permanent site file.

It is LILCO's understanding that the above information is confirmatory and sufficient to allow closure of these items.

In accordance with R. L. Tedesco's letter to LILCO dated January 21, 1981, four copies of this letter are being forwarded directly to Dr. Morris Reich at Brookhaven National Laboratory.
