Gentlemen:

Subject: VIRGIL C. SUMMER NUCLEAR STATION
DOCKET NO. 50/395
OPERATING LICENSE NO. NPF-12
NRC GENERIC LETTER 88-18
PLANT RECORD STORAGE ON OPTICAL DISK

Virgil C. Summer Nuclear Station (VCSNS) is pending the implementation of an imaging system for the storage of permanent records and is therefore notifying the NRC of our decision to utilize this storage media as required by Generic Letter 88-18.

VCSNS is currently preparing to install an imaging system to improve the handling of documentation and expedite the retrieval of records. Plant records will be scanned or electronically transferred to an optical disc storage medium. COLD (Computer Output to Laser Disk) technology will be utilized in the electronic transfer. These stored "images" will be retrieved via workstations throughout the plant. VCSNS has received written approval from the company's legal counsel regarding the legality of this action in the state courts. The ANI/MAELU Account Engineer is also being notified of the decision to utilize optical storage.

Specific quality controls for an optical disk document imaging system as indicated in Generic Letter 88-18 will be established by site procedures.

Please contact Ms. Kathy Culp at (803) 345-4035 if you have any questions.

Very truly yours,

John L. Skolds
