South Texas Project Electric Generating Station
Units 1 and 2
Docket Nos. STN 50-498; STN 50-499
Submittal of Revised Safety Parameter
Display System Safety Analysis Report

- Reference:
- 1) Completion of Modifications to the Safety Parameter Display System (SPDS) for the First Refueling Outage; M. A. McBurnett, HL&P; Letter to the NRC; January 5, 1990; ST-HL-AE-3320.
 - 2) Rescheduling of the Resolution of Category C Human Engineering Deficiencies Originally Scheduled for the Unit 1 Third Refueling Outage; A. W. Harrison, HL&P; Letter to the NRC; February 18, 1991; ST-HL-AE-3686.

In reference 1, Houston Lighting & Power (HL&P) committed to send the Nuclear Regulatory Commission an update to the Safety Parameter Display System (SPDS) Safety Analysis Report upon completion of modifications to the SPDS in Units 1 and 2 for addressing Category C Human Engineering Deficiencies (HED). The modifications were scheduled to be completed prior to startup from the third refueling outage of Unit 1 and the second refueling outage of Unit 2. In reference 2, HL&P reported that the SPDS modification for Unit 1 would be deferred until the Unit 1 fourth refueling outage. The SPDS HED modifications are now completed and the revised SPDS Safety Analysis Report is attached.

11

The remainder of the computer system HED modifications described in reference 2, with the exception of the remaining group of non-SPDS displays in ERFDADS, have been completed and are included in the updated SPDS Safety Analysis Report where appropriate. Any changes to the remaining group of non-SPDS displays in ERFDADS are planned to be performed with the remaining Proteus display changes which are to be completed in conjunction with the combination of ERFDADS and Proteus into the Integrated Computer System.

If you should have any questions on this matter, please contact Mr. K. J. Taplett at (512) 972-8416 or me at (512) 972-8787.
