Attention: Document Control Desk

Subject: Quad Cities Station Unit 1  
Correction of Technical Specification Pages  
Standby Liquid Control System  
NRC Docket No. 50-254

References: J. Stang to D.L. Farrar letter dated November 16, 1994

In the referenced letter, Commonwealth Edison (ComEd) received NRC approval of a proposed license amendment to Appendix A (Technical Specifications) of Facility Operating Licenses DPR-29 and DPR-30 (Quad Cities Station Units 1 and 2). The license amendment (Amendments 151 and 147 to DPR-29 and DPR-30) included revised Technical Specification and Bases pages for section 3.4/4.4-4, Standby Liquid Control System.

There are three typographical errors in the revised Technical Specification and Bases Pages for DPR-29 (Quad Cities Station Unit 1). These errors are purely administrative in nature, and in no way affect the technical content of the Technical Specifications.

Enclosure 1 to this letter provides marked-up Technical Specification pages for Quad Cities Station Unit 1, with the correction of the three typographical errors. Enclosure 2 to this letter provides retyped Technical Specification pages, with the corrections incorporated.

ComEd respectfully requests approval to incorporate the corrected Technical Specification pages (Enclosure 2) by January 14, 1995. This will allow ComEd to implement the correct Technical Specification pages in accordance with the original implementation schedule stated in the referenced letter.

Commonwealth Edison apologizes for any inconvenience that this may have caused. If there are any questions or comments, please direct them to this office.

John L. Schrage  
Nuclear Licensing Administrator

Enclosures 1 & 2

cc: J. Martin, Regional Administrator - RIII  
C. Miller, Senior Resident Inspector - Quad Cities  
R. Pulsifer, Project Manager - NRR
