Subject: Amendment 16 to the Fire Protection Report

Byron Nuclear Power Station, Units 1 and 2
NPF-37/66; NRC Docket Nos. STN 50-454/455

Braidwood Nuclear Power Station, Units 1 and 2
NPF-72/77; NRC Docket Nos. STN 50-456/457

- References:
- (1) December 18, 1992 letter, T. W. Simpkin (ComEd) to T. E. Murley (NRC), Fire Protection Report - Amendment 15
 - (2) June 15, 1993 letter, J. B. Hickman (NRC) to D. L. Farrar (ComEd), Commonwealth Edison Proposal for Updated Final Safety Analysis Report Revision Submittal Frequency (TAC Nos. M86432, M86457, M86458, M86459, M86460, M86461, M86462, M86463, M86464, M86465, M86466, and M86467)

In Reference (1) the Commonwealth Edison Company (ComEd) provided the Nuclear Regulatory Commission (NRC) Staff with Amendment 15 to the Byron/Braidwood Stations Fire Protection Report (FPR). Concurrent with the preparation of that submittal, Title 10, Code of Federal Regulations, Part 50, Section 71, Paragraph (e) Subparagraph (4) [10 CFR 50.71(e)(4)] was revised in response to a federal government initiative to reduce the unnecessary burden of government regulation by extending the interval between updates of licensee Final Safety Analysis Reports (FSARs). In Reference (2) the Staff agreed with ComEd's proposal to provide updates to the Byron/Braidwood Stations Updated Final Safety Analysis Report (UFSAR) to the NRC no later than 24 calendar months from the submittal date of the previous revision. Since the Byron/Braidwood Stations UFSAR is incorporated by reference into the Byron/Braidwood Stations UFSAR, Chapter 9.5, it is also being updated on a frequency of 24 calendar months from the submittal date of the previous revision.

ADD 1/10

December 16, 1994

Accordingly, Amendment 16 to the Byron/Braidwood Stations FPR is enclosed. The changes included in Amendment 16 are changes to the facilities and procedures that were in effect as of June 18, 1994. These changes do not represent a decrease in the level of fire protection which would require prior NRC approval in accordance with the following:

- 1) Condition 2.C.6 of the Byron Unit 1 Facility Operating License, NPF-37,
- 2) Condition 2.E of the Byron Unit 2 Facility Operating License, NPF-66,
- 3) Condition 2.E of the Braidwood Unit 1 Facility Operating License, NPF-72, and
- 4) Condition 2.E of the Braidwood Unit 2 Facility Operating License, NPF-77.

Attached to this letter is a detailed change log which identifies and explains all changes from Amendment 15 of the Byron/Braidwood Stations FPR. This is being provided as an aid to the Staff to assist in the review of the changes made.

Pursuant to 10 CFR 50.4(b)(6), one (1) signed original and ten (10) copies are being provided to the Document Control Desk, plus one (1) copy to the NRC Region III office and one (1) copy each to the Byron and Braidwood Resident Inspectors offices.

Please address any questions or comments regarding this submittal to this office.

Sincerely,

Harold D. Pontious, Jr.
Nuclear Licensing Administrator
