Gentlemen:

ULNRC-2106

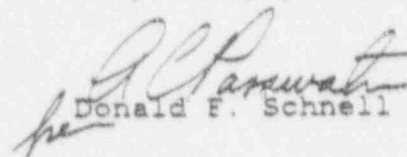

DOCKET NO. 50-483
CALLAWAY PLANT
FINAL SAFETY ANALYSIS REPORT REVISION OL-3A

Furnished herewith are thirteen (13) copies of Revision OL-3A to the Callaway Plant Final Safety Analysis Report (FSAR) Standard Plant. Please note that we have furnished three additional copies over the ten required by 10CFR50.4 (b)(6) to facilitate revision of the thirteen (13) copies of the 2-year update which was submitted on June 4, 1986.

This supplemental revision to Revision OL-3 incorporates information that was incorrect or missing from the FSAR. Revision OL-3A corrects the magnesium concentration in FSAR Table 5.2-5 which was incorrect because of a typographical error. It also revises FSAR Sections 9.1 and 9.1A to reflect the Vantage 5 fuel design and incorporates the maximum fuel enrichment of 4.25 w/U-235. The above FSAR sections should have been revised after the issuance of Amendments 23 and 28 but they were inadvertently overlooked.

Please accept our apology for any inconvenience this omission may have caused. If there are any questions, please contact us.

Very truly yours,

Donald F. Schnell

JMC/pkn
