Ladies and Gentlemen:

VOGTLE ELECTRIC GENERATING PLANT  
RESUBMITTAL OF REQUEST TO REVISE TECHNICAL SPECIFICATION  
ADDITION OF AUTOMATIC LOAD SEQUENCER

Georgia Power Company (GPC) previously submitted a request to add the automatic load sequencer to the Vogtle Electric Generating Plant (VEGP) Technical Specifications (TS) by letters ELV-3945, dated January 22, 1993, and LCV-0063, dated August 6, 1993. Because of subsequent issues raised and discussed with NRR during a meeting on February 2, 1994, concerning the applicable TS sections affected by the automatic load sequencer during different modes of plant operation, Georgia Power Company resubmits this request to revise the Technical Specifications. This resubmittal should replace and supersede all portions of the previously submitted letters referenced above.

In accordance with the provisions of 10 CFR 50.90, Georgia Power Company hereby proposes to amend the Vogtle Electric Generating Plant Unit 1 and Unit 2 Technical Specifications, Appendix A to Operating Licenses NPF-68 and NPF-81.

Georgia Power Company requests approval of this amendment by April 1, 1995.

ADD

The proposed change and the bases for the change are described in enclosure 1 to this letter. Enclosure 2 provides an evaluation pursuant to 10 CFR 50.92 showing that the proposed changes do not involve significant hazards considerations. Instructions for incorporation of the proposed changes into the Technical Specifications and a copy of the changes are provided in enclosure 3.

In accordance with 10 CFR 50.91, the designated state official will be sent a copy of this letter and all enclosures.

Mr. C. K. McCoy states that he is a vice president of Georgia Power Company and is authorized to execute this oath on behalf of Georgia power company and that, to the best of his knowledge and belief, the facts set forth in this letter and enclosures are true.

**GEORGIA POWER COMPANY**
