Perry Nuclear Power Plant
Docket No. 50-440
Perry Course of Action
Schedule Change

Gentlemen:

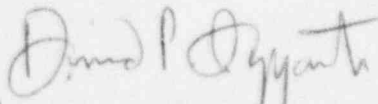

The Perry Nuclear Power Plant Course of Action (PCA) was submitted to the NRC on November 15, 1993. The PCA is a broad-based performance improvement program for the Perry Nuclear Power Plant. The PCA progress report was submitted September 26, 1994, (reference letter PY-CEI/NRR-1863L). Section 4.4.9, ILRT/LLRT Program, identified a schedule date of December 31, 1994 to incorporate reduced accident pressure and third party review comments into Perry Administrative Procedure (PAP)-1120, Leak Testing Program.

Draft 2 of PAP-1120 and revisions to 7 implementing instructions were developed; however, due to the extensive changes to resolve comments, the December 31, 1994 due date is not achievable. An extended due date of April 30, 1995 is required to allow adequate time for review and approval of the Leak Testing Program upgrades.

The change in completion schedule for this commitment was discussed in a telephone conference with members of the NRC staff on December 21, 1994.

If you have questions or require additional information, please contact Mr. James D. Kloosterman, Manager - Regulatory Affairs at (216) 280-5833.

Very truly yours,

for Robert A. Stratman
