dated January 26, 1990

Subject: Withdrawal of Proposed Technical Specification
Change - Containment Isolation Valves

Pursuant to 10CFR2.107, Detroit Edison requests the Reference 2 Operating License Amendment application be withdrawn. Reference 2 proposed Technical Specification (TS) changes to improve consistency amongst Specifications which address containment isolation valves. Reference 2 also proposed to change TS 3/4.6.4.2, "Reactor Building to Suppression Chamber Vacuum Breakers", to include the air-operated isolation valve associated with the vacuum breaker check valves. Discussions with the NRC staff have led to the conclusion that these changes should be withdrawn.

If you have any questions concerning this request, please contact Mr. Glen D. Ohlenacher at (313) 586-4275.

Sincerely,

cc: A. B. Davis
