Docket Nos. 50-424
50-425

U. S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Washington, D. C. 20555

Gentlemen:

VOGTLE ELECTRIC GENERATING PLANT
SPECIAL NUCLEAR MATERIAL CONTROL AND ACCOUNTABILITY

The Vogtle Electric Generating Plant (VEGP) is a dual unit plant. It has two spent fuel storage pools that are interconnected and a new fuel storage pit that is common to both units. Fuel assemblies, fission chambers, and other items classified as Special Nuclear Material (SNM) may be used in either unit.

Currently, SNM is tracked and reported under the two separate Reporting Identification Symbols (RIS): XIH for Unit 1 and XIJ for Unit 2. Material transactions between the units are currently treated as transactions between the two RISs, and as such, require filing DOE/NRC-741 forms following each transaction.

In order to simplify record keeping and reduce the number of DOE/NRC-741 forms to be filed with the Department of Energy, Georgia Power Company requests that the RIS XIH be deleted so that all SNM at VEGP can be tracked and reported under the single RIS XIJ. Currently, XIH has a zero balance as of the end of the last semiannual reporting period ending on March 31, 1991. Georgia Power Company requests that the deletion of XIH be effective as of the date of this letter.

Below is an updated list of SNM contacts for VEGP so that you may update your SNM files:

Corporate: Robert J. Florian
P. O. Box 1295
Birmingham, Alabama 35201
(205) 877-7083

Site: Terry L. Wendt (SNM Custodian)
(404) 826-3178

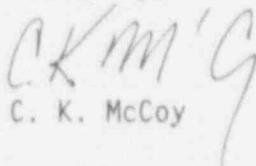

Sam A. Bradley (Alternate SNM Custodian)
(404) 826-4148

Vogtle Electric Generating Plant
P. O. Box 1660
