NUCLEAR PRODUCTION DEPARTMENT

U. S. Nuclear Regulatory Commission
Office of Nuclear Reactor Regulation
Washington, D. C. 20555

Attention: Mr. D. H. Beckham, Chief
Operator Licensing Branch

Dear Mr. Beckham:

SUBJECT: Grand Gulf Nuclear Station
Units 1 and 2
Docket Nos. 50-416 and 50-417
License No. NPF-13
File 2060/L-860.0
Operator Licensing Examination
Schedule
AECM-84/0006

Mississippi Power & Light Company (MP&L) is providing this letter in response to a letter from D. G. Eisenhut to all power reactor licensees, dated December 21, 1983, regarding operator licensing examinations (Generic Letter No. 83-40).

In accordance with Mr. Eisenhut's request, the attachment to this letter provides estimates of operator licensing examination requirements for Grand Gulf Nuclear Station (GGNS) Unit 1, based on current training and operator requirements. In projecting examination requirements for the four years requested, MP&L has included factors which account for attrition, failure, and promotions based on previous operator licensing experience and future requirements resulting from the issuance of a full power operating license. Please be advised that our estimates do not include any GGNS Unit 2 related requirements. At present GGNS Unit 2 is under construction, and no licensing action is expected to occur for several years. It is MP&L's position that meaningful estimations of operator licensing examination requirements for GGNS Unit 2 can not be provided at this time.

If you have any questions or require further information, please contact this office.

Yours truly,
