RE: Perry Nuclear Power Plant
Docket Nos. 50-440; 50-441
Lubricating Oil System Defect in
Standby Diesel Generators [RDC 24(81)]

Dear Mr. Keppler:

Our letter to you dated July 1, 1983, stated that the installation of tubing for modification of the turbocharger lubricating oil system would be completed by December 1983 for Unit 1 and February 1984 for Unit 2.

Presently, all of the required parts have been received. However, installation cannot begin until heavy construction work in the immediate vicinity is completed (thus precluding potential damage to the delicate tubing).

We now anticipate completion of the tubing installation by April 1984 for Unit 1 and July 1984 for Unit 2.

Please contact us if you have any questions.

Sincerely,

Murray R. Edelman
Vice President
