Mr. H. R. Denton, Director
Office of Nuclear Reactor Regulation
Attn: Document Control Desk
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Subject: Crystal River Unit 3
Docket No. 50-302
Operating License DPR-72
Technical Specification Change Request No. 106, Rev. 1
Control of Personnel Access to High Radiation Areas

Dear Mr. Denton:

Florida Power Corporation hereby submits three (3) originals and forty (40) copies of Technical Specification Change Request No. 106, Revision 1, requesting amendment to Appendix A of Operating License No. DPR-72. Proposed replacement pages for Appendix A are attached.

This proposed change will allow the use of roped and marked access barriers to high radiation areas of the plant when permanent locked enclosures cannot be readily constructed. This revision to our initial request dated March 18, 1983, has been made to incorporate NRC staff comments.

Florida Power Corporation considers the requested action involves a Class III amendment, per 10 CFR 170.22, in that it involves a single safety issue. A check in the amount of four thousand dollars (\$4,000) was included in the initial request, dated March 18, 1983. Therefore, no additional license fees are enclosed.

Also attached is a signed Certificate of Service for Technical Specification Change Request No. 106, Revision 1, to the Chief Executive of Citrus County, Florida.
