Specification Changes
NRC Docket No. 50-373

Reference (a): LaSalle County Station Unit 2 license NPF-18
dated December 16, 1983

Dear Mr. Denton:

The purpose of this letter is to request the following change in technical specifications for LaSalle County Station Unit 1.

Change request NPF-11/84-02 - Revise Unit 1 Technical Specifications to reflect changes incorporated into Unit 2 Technical Specifications.

This proposed change is addressed in Attachment A and has received Onsite and Offsite review and approval.

Commonwealth Edison Company has reviewed this amendment request and has determined that no significant hazard consideration exists. Our review is documented in Attachment B.

Pursuant to 10 CFR 170, this change reflects one example of a Class II amendment. This change has recently (12-16-83) been reviewed, approved and issued by the NRC on LaSalle County Station Unit 2, NPF-18. Although it does not qualify for a Class I amendment because the review is not exactly concurrent with Unit 2 the NRC staff has been aware of Commonwealth Edison Company's intention to upgrade the Unit 1 Technical Specifications to reflect changes made in the Unit 2 specifications. As such, a remittance of \$1,200.00 is enclosed.
