☐ HOLD POINT NOTIFICATION

CONDITION DETAILS

In reviewing a checklist developed by Bechtel Lead Field Engineers as an aid in conducting Status Assessments to Procedure FPM-7.000 Rev. 1 (Mechanical System Status and Completion), the CIO noted that the checklist does not include all of the attributes required by the procedure.

If special checklists are to be used in statusing, these lists should be addressed by an administrative procedure that provides details on how the lists are to be prepared, used and controlled.

CPCo is requested to provide CIO with the intended use of these checklists and the attendant control measures to be provided.
