Dr. Thomas E. Murley, Administrator
Office of Inspection and Enforcement
Region I
U. S. Nuclear Regulatory Commission
631 Park Avenue
King of Prussia, PA 19406

SUBJECT: Modification to Philadelphia Electric
Company response to IE Bulletin 79-19

REFERENCE: Letter to B. H. Grier from S. L. Daltroff
dated September 28, 1979 (IE Bulletin 79-19)

Dear Dr. Murley:

This letter is in regard to a one-time modification of the 1983 annual retraining for shift supervision involved in the transfer, packaging and transport of radioactive material as specified in my letter dated September 28, 1979.

Changes proposed in regulatory requirements, 10CFR Part 20 and 10CFR Part 61, associated with the classification, packaging and shipment of radioactive waste, which became effective December 27 of this year, necessitate revisions to the Peach Bottom Radwaste Procedures.

Incorporating these changes into the training program makes desirable the short deferral of the annual retraining sessions for shift supervision, pending completion and approval of the revised procedures, and incorporating the procedures into

IEII

the training program. It is intended, therefore, to modify our response to IE Bulletin 79-19, for this year (1983) only, to the extent that the Radwaste Supervisory retraining be completed by March 1, 1984 to accomodate updating the training to conform to the new regulatory requirements.

Between December 27 and March 1, 1984, only personnel who are knowledgeable of the regulations and the revised implementing procedures will be permitted to supervise radwaste classification, packaging and shipping operations.

If you have any questions or need any additional information please do not hesitate to contact us.

Very truly yours,

A handwritten signature in dark ink, appearing to read "J. F. Stolz", with a stylized flourish at the end.
