Subject: Limerick Generating Station, Unit 1
Proposed Technical Specifications

Reference: Telecon between R. Martin, D. Hoffman, USNRC,
and J. T. Robb, J. Armstrong, PECO on
November 14, 1983

Enclosure: Limerick Generating Station Unit 1
Proposed Technical Specifications

Dear Mr. Schwencer:

The LGS FSAR states in Section 16.2 "The proposed final technical specifications will be submitted later using the NRC's Standard Technical Specifications for BWRs (NUREG-0123) as a guide."

Attached, per your request in the reference telecon, is a copy of the LGS Unit 1 Proposed Technical Specifications in "marked-up" condition. Certain time frames have been replaced with the annotation "(later)" in several specifications. This annotation indicates a review will be performed to evaluate the effect of varying such time frames. Therefore, these time frames will be provided at a later date.

Also included in this transmittal is the Offsite Dose Calculation Manual referenced in these Proposed Technical Specifications.

Very truly yours,

Original signed by
