

SOUTH CAROLINA ELECTRIC & GAS COMPANY

POST OFFICE 764

COLUMBIA, SOUTH CAROLINA 29218

O. W. DIXON, JR.
VICE PRESIDENT
NUCLEAR OPERATIONS

January 18, 1984

Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: Virgil C. Summer Nuclear Station
Docket No. 50/395
Operating License No. NPF-12
Technical Specification Change
Table 3.8-1 "Containment
Penetration Conductor Protective
Device Test Setpoint Criteria"

Dear Mr. Denton:

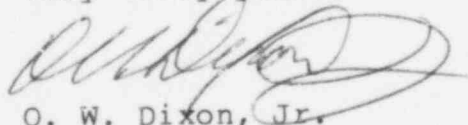

South Carolina Electric and Gas Company (SCE&G) requests a revision to the Virgil C. Summer Nuclear Station Technical Specifications, Table 3.8-1, "Containment Penetration Conductor Protective Device Test Setpoint Criteria," providing for the addition of the breakers as shown on Attachment I which were inadvertently omitted from the Technical Specifications. These breakers provide the primary and backup penetration protection to the Reactor Building Sump Isolation Valves located in separate mini-containments outside the Reactor Building that function as extensions of containment.

SCE&G has determined that a finding of no significant hazards consideration is appropriate in that additional requirements are being added to the Technical Specifications. These breakers have been subjected to the same examination and testing program as other breakers identified in Table 3.8-1.

This change has been reviewed and approved by our Plant Safety Review Committee (PSRC) and the Nuclear Safety Review Committee (NSRC). A check in the amount of Four Thousand Dollars (\$4000.00) is enclosed for processing this change.

If there are any questions, please advise.

Very truly yours,

O. W. Dixon, Jr.
