Docket No. 50-267

SUBJECT: REVISION TO FPOR-14, FIRE DOORS

REFERENCE: PSC Letter, Crawford to USNRC, dated July 22, 1991
(P-91231)

Gentlemen:

Enclosed is one original and ten additional copies of Fire Protection Operability Requirement (FPOR) 14, Issue 7, and the revised Table of Contents (TOC), Issue 16.

The TOC and FPOR should be inserted as replacement pages in Section FP.6.1 of the Fort St. Vrain (FSV) Fire Protection Program Plan, Revision 5, which was submitted to the NRC in the referenced letter. This FPOR revision is being transmitted in accordance with the requirements of 10 CFR 50.71(e).

FPOR-14 ensures that certain fire doors in Table FPOR-14-1 are operable. The fire doors perform the same basic functions as fire barriers. Also listed in the table are doors which are maintained as Halon barriers only. Door #D16 has been eliminated from the table since it is neither a fire door nor a Halon barrier.

A 10 CFR 50.59 safety evaluation was performed on the FPOR revision. The evaluation determined that the revision was not safety related or safety significant, and did not involve or create an unreviewed safety question. The revision does not require changes to the FSV Technical Specifications.
