Operating Reactors Branch #3
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, DC 20555

SUBJECT: Arkansas Nuclear One - Units 1 & 2
Docket Nos. 50-313 and 50-368
License Nos. DPR-51 and NPF-6
Appendix I Technical Specification

Gentlemen:

This is to confirm our recent telephone conversations with your Messrs. Guy Vissing and Oliver Lynch concerning Arkansas Power & Light Company's Appendix I response for Arkansas Nuclear One - Units One and Two (ANO-1&2). Our response was scheduled for February 28, 1983, as confirmed in your letter dated December 14, 1982 (ØCAN128313).

As discussed with Messrs. Vissing and Lynch, we must request an extension to submit our response to your request for AP&L's resolution to the Appendix I issue for ANO-1&2. This delay is necessary because of unexpected difficulties discovered during our final review, the impact of work priorities related to the current ANO-1 refueling outage and NRC's request for an expedited submittal of a Technical Specification Change Request to delete all nonradiological water quality surveillance requirements from the ANO-1&2 Technical Specifications. We will submit a revised schedule by March 11, 1983, for making our Appendix I response to NRC.

Very truly yours,

John R. Marshall
John R. Marshall
Manager, Licensing
